

1,4SIGHT®

KEEPING YOUR STORED POTATOES FIELD-FRESH

1,4SIGHT® is a dormancy enhancer & sprout suppressant. It reduces tuber respiration, putting them in a dormant state, resulting in less weight loss & maintained quality. Suitable for all storage types & conditions in both fresh & processing sectors.

CONTROLS SPROUTS

ACTIVE SUBSTANCE

1,4-dimethylnaphthalene (DMN)

Naturally occurring dormancy enhancer in potatoes

LOWERS WEIGHT LOSS

DOSE RATE

Max. individual dose: 20ml/t

Max. dose per season: 120ml/t

Optimise with regular close inspections

SAVES ENERGY
